POLARIS

INTRODUCING THE 2022 SPORTSMAN 570 AND XP 1000 RIDE COMMAND EDITIONS

SMOOTHEST

DURO TIRES (26" 570 / 27" XP 1000)

Tires that provide more traction and control over the terrain when you need it. Giving you the confidence to keep traction in loose terrain and roll over obstacles while keeping the vehicle steady.

INDEPENDENT REAR SUSPENSION

Suspension to keep your tires grounded and optimize your approach angle to obstacles. Gives a smoother ride experience by keeping the vehicle level and giving you the confidence to keep going all day without the fatigue of bouncing around.

GROUND CLEARANCE (11.5" 570 / 12" XP 1000)

Provides more room and underbody protection to easily clear trail obstacles. Giving you the peace of mind knowing your machine can clear obstacles and keep you on the trail for longer.

STRONGEST

FRONT TRAIL BUMPER

Bumper that provides rider and vehicle protection no matter where the adventure takes you. You can rest easy knowing your vehicle will finish the day with minimal scratching or damage.

POLARIS HD 3,500 LB WINCH

Strong synthetic rope with auto stop and the power to pull. Whether it be a mud pit or downed tree – you have the capability to keep going and enjoy more of the ride.

TOWING CAPACITY (1,350 LB 570 / 1,500 LB XP 1000)

Trust the towing capacity to get jobs done quicker for trailers and equipment. Be able to pull more and work less, saving time for more important things.

MOST VERSATILE

7" GLOVE-TOUCH DISPLAY POWERED BY RIDE COMMAND

Includes GPS navigation, group ride, and thousands of waypoints right at your fingertips, even without cell service. Also comes with plow mode, satellite maps, Pin Activated Security System (P.A.S.S.), and over the air updates. You can explore new areas, navigate the trails easily, and keep your vehicle secure while you're away with confidence.

LED POD & BUMPER LIGHTS

Ability to see the trail ahead in dusty or low-light conditions. Extend the ride — you can start the ride earlier and end later into the night, knowing you can easily see.

MULTI-SELECT EPS & DRIVE MODES

Adjustable steering assistance to alter the level of steering assist provided and the ability for the rider to manage acceleration to give specific performance where you need it. Allows for customization to have one machine to explore the trails and work around the house.
